The Global LNG Bunkering Experience  
9 – 10 March 2021

**Turgut Ataman | LNG Shipping Manager  
(Commercial) | Shell**

---

**What are you currently responsible for within the LNG Bunkering Sector?**

LNG Shipping Manager (Commercial)

**What organisations/industry do you work with most frequently?**

Development, implementation of the network strategy Acquisition, Divestment of bunker vessels.

**What organisations/industry do you work with most frequently?**

Ship owners / Yards / Brokers / Financing Institutions.

**Which area of LNG Bunkering do you specialise in?**

Ship to Ship Bunkering of Deep Sea Trading Vessels.

**What plans in terms of projects do you have over the next year/2 years?**

Shell is committed to develop LNG bunkering network globally and intended to increase number of LNG bunker vessels in operation significantly in the coming years both in terms of adding new assets to existing locations but also as opening up new locations.

**What are the trends and opportunities for you and / or the sector currently?**

LNG bunkering and LNG as marine fuel is on the rise especially with more supply availability coming into the market together with the extension of the bunkering network. We expect more and more ship owners investing in LNG propelled vessels in the coming years.

**Why is now a good time for The Global LNG Bunkering Experience and what do you expect to gain from your participation?**

My primary objective is to express Shell's commitment to develop LNG bunkering and our strong belief as LNG being the most viable solution to today's decarbonization challenge in maritime space.
